

Street Lights

The board does not have a set policy for street lights.

In the past, when residents have approached the board requesting a street light, the board has agreed to install the street light but the residents were responsible for paying the electric for that light.

An exception is at the intersection of Co Rd 9 and 56th Street NE. Kandiyohi Power Coop offered to install the light at no cost. Out of safety concerns due to the volume of traffic going to and from the Catholic Church, the board decided to install a street light at that location and pays for the electricity for that light.
