

Spraying/No Spraying Areas

If residents would like to be put on a “No Spray List”, they will need to address the board at a board meeting and make a formal request.

If the board approves the request to be put on a “No Spray List”, the resident will be responsible for posting the area for no spraying in a manner that is acceptable to the board. The resident will also be responsible for keeping their ditch free of weed and brush overgrowth.

The board will let the sprayer know of the “no spray” area.

Keep note of residents who request “no spray”.
